

Greater Hickory MPO

Traffic Analysis Zone Socioeconomic Projections

2019-2050

The Greater Hickory Metropolitan Planning Organization, in coordination with the NCDOT, USDOT, and local stakeholders, is charged with planning for the transportation needs of the future for all of Alexander, Burke, Caldwell, and Catawba Counties. To identify future demands, Transportation Planners rely on Travel Demand Modeling. Travel Demand Modeling uses current travel behaviors, and socioeconomic projections, in order to model anticipated transportation demands. GHMPO Planning Staff are charged with the collection of these socioeconomic projections, and this data collection is carried out using Traffic Analysis Zones. The existing and projected conditions chapter of this Metropolitan Transportation Plan provides a full explanation of the data collection methods for Traffic Analysis Zones. **This Appendix includes four data sets, featured in the following order: 2019 Employment Data, 2019 Population and Household Data, 2050 Employment Projections, 2050 Population and Household Projections.**
